

# Design an Olympic Emblem

Every Olympic Games has a unique logo or emblem, designed by the host city. Visit [www.olympic.org](http://www.olympic.org) to find examples of emblems, and print out and paste, or draw, the current emblem in the space below. See if you can find out what the designers of the emblem intended to portray.

Now design your own emblem, imagining that your town or city is hosting the next Olympic Games. Explain your design.

The image shows a white rectangular sheet of paper oriented vertically. A thick black cross divides the page into four equal square quadrants. The top-left and bottom-right quadrants are completely blank. The top-right and bottom-left quadrants contain horizontal ruling lines, spaced evenly apart, resembling notebook paper. Each ruled quadrant has approximately 10 lines. The corners of all four quadrants are rounded.
